**Subject: HAMPSTEAD -Johnson and Johnston Associates, Inc., 130 Route 111, Request for Groundwater Management Permit, DES Site # 200001038**

Dear Mr. Bean:

The New Hampshire Department of Environmental Services (Department) is in receipt of the Additional Site Investigation letter dated May 8, 2002 and the Additional Site Investigation Report dated June 5, 2002 prepared on behalf of Johnson and Johnston Associates, Inc., (JJA) by Cushing & Jammallo, Inc.

Based on the information presented in these reports and our May 7, 2002 telephone conversation, the Department will not require additional investigation in the area of monitoring well ATC-2 at this time. The Department reserves the right to require additional investigations or remedial measures if further information indicating the need for such work becomes known or if groundwater quality continues to degrade at the site.

Due to the continued violation of Ambient Groundwater Quality Standards at the site, the Department is requesting that JJA complete and submit an application for a Groundwater Management Permit (GMP). The GMP will formalize the groundwater monitoring program that JJA is currently conducting.

The Department requests that JJA submit the completed GMP application by December 1, 2002. If you have any questions or need additional information, please contact me at (603) 271-2800.

Sincerely,

David C. Bowen, P.G.  
Hazardous Waste Remediation Bureau
